EDUCATION

Bachelor of Science in Computer Science | University of Central Florida, Orlando, FL

May 2026

Relevant Coursework: Data Structures, Algorithms and Analysis, Database Systems, Discrete Computational Structures, Processes for Object Oriented Software Development

Awards & Honors: Dean's List

EXPERIENCE

Member | KnightHacks at University of Central Florida

January 2025 - May 2026

- Built backend services and database schemas for team projects in hackathon settings.
- Accelerated development using AI coding tools such as Claude Code to rapidly prototype features, scaffold APIs, and debug under hackathon deadlines while manually reviewing and validating output.
- Supported frontend development and UX/UI design to deliver demo-ready applications.

Software Developer | Scoring Engine, Open Source Project

August 2025 - May 2026

- Developed in a full Python stack using Flask, SQLAlchemy, Celery and other Python modules for a cybersecurity competition scoring platform.
- Integrated AI-assisted workflows (Claude Code) into GitHub for repository review, unit test generation, and documentation while manually validating all output.
- Developed a complete rework of the existing Scoring Engine grading process for cybersecurity competitions.
- Collaborated with a team using Agile workflow with daily standups and scheduled Sprints with the use of Jira.
- Resolved user-reported GitHub issues, such as implementing retry/backoff behavior for Celery workers.

TECHNICAL PROJECTS

University Event Site | LAMP Stack

August 2024 - December 2024

- Designed the full MySQL database and built backend functionality for an event platform with public, private, and RSO listings.
- Enabled users to create and join RSOs, and to view, register for, review, and comment on permitted events.

Fitness Tracker and Workout Manager | MERN Stack

January 2025 - May 2025

- Modeled and managed Users, Exercises, and Workouts collections using MongoDB Shell, GUI, and Playground.
- Engineered the REST API and connected it to MongoDB and the React frontend.
- Refactored frontend functions to properly communicate with the API.

SKILLS

- **Programming Languages:** Python, Java, C#, C++, JavaScript, TypeScript, Kotlin, PHP, SQL, HTML, CSS
- **Frameworks & Libraries:** Flask, SQLAlchemy, Celery, React, Express, Node.js, Nginx
- **Databases:** MySQL, PostgreSQL, MariaDB, MongoDB
- **Cloud & Devops:** Amazon Web Services, Docker, Git, GitHub, Jira
- **AI Tools:** Claude Code, GitHub Copilot
- **Development Skills:** RESTful API Design, API Integration, Database Design, Database Administration, UX/UI Design, Agile Workflow
